## **NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2017 (unaudited)**

### **1. The Company**

Gyrodyne, LLC (“Gyrodyne”, the “Company” or the “Registrant”) is a limited liability company formed under the laws of the State of New York. The Company’s primary assets are comprised of a geographically diverse portfolio of medical office and industrial properties located on Long Island and in Westchester County, New York.

Substantially all of our developed properties are subject to leases in which the tenant reimburses the Company for a portion, all of or substantially all of the costs and/or cost increases for utilities, insurance, repairs, maintenance and real estate taxes. Certain leases provide that the Company is responsible for certain operating expenses.

The Company manages its business as one operating segment. The Company’s corporate strategy is to pursue zoning and/or entitlement opportunities which are intended to increase the values of our two remaining major properties (Flowerfield and Cortlandt Manor) so that they can be sold at higher prices (than those achievable under their current entitlements) that will maximize distributions to our shareholders during the liquidation process within a reasonable period of time and then dissolve the Company. The value of the real estate reported in the Statements of Net Assets as of September 30, 2017 and December 31, 2016 (predicated on current asset values) does not include any potential value impact that may result from such value enhancement efforts. There can be no assurance that our value enhancement efforts will result in property value increases that exceed the costs we incur in such efforts, or even any increase at all.

Our efforts to generate the highest values for Flowerfield and Cortlandt Manor may involve in limited circumstances the acquisition of certain adjacent properties, pursuit of joint venture relationships, entitlements and/or zoning changes, other investments and/or other strategies to enhance the net value of Flowerfield and Cortlandt Manor to maximize the returns for our shareholders. The Company does not expect the acquisition of properties or the pursuit of joint ventures, if any, to adversely affect the timing of distributions to our shareholders. Gyrodyne intends to dissolve after it completes the disposition of all of its real property assets, applies the proceeds of such dispositions first to settle any debts and claims, pending or otherwise, against Gyrodyne, and then makes liquidating distributions to holders of Gyrodyne common shares. The liquidation process and the amount and timing of distributions involve risks and uncertainties. As such, it is impossible at this time to determine the ultimate amount of proceeds that will actually be distributed to our shareholders or the timing of such payments. Accordingly, no assurance can be given that the distributions will equal or exceed the estimate of net assets in liquidation presented in our Consolidated Statements of Net Assets. The actual nature, amount and timing of all distributions will be determined by Gyrodyne’s Board in its sole discretion, and will depend in part upon the ability to convert our remaining assets into cash in compliance with our obligations under the Stipulation entered into in connection with the class action lawsuit (See Note 13 – Contingencies) and settle and pay our remaining liabilities and obligations. Under Gyrodyne’s Amended and Restated Limited Liability Company Agreement (the “LLC Agreement”), such dissolution may be effected upon the vote of holders of a majority of Gyrodyne common shares or, in the Board’s discretion and without any separate approval by the holders of the Gyrodyne common shares, at any time the value of Gyrodyne’s assets, as determined by the Board in good faith, is less than \$1,000,000.

After giving effect to the Company’s dispositions of real property (See Note 8), the Company owns one remaining medical office park and one of fourteen buildings in a second medical office park, together comprising approximately 37,000 rentable square feet and a multitenant industrial park comprising approximately 130,000 rentable square feet. The aforementioned industrial park is situated on ten acres of a 68-acre property in St. James, New York, all of which is owned by the Company. Each of the medical office park in Cortlandt Manor, the building in the Port Jefferson Professional Park and the Flowerfield Industrial Park (including its undeveloped portion) is individually held in a single asset LLC wholly owned by the Company.

### **2. Strategic Plan to Enhance Property Values, Liquidate and Dissolve**

Our corporate strategy is to pursue zoning and/or entitlement opportunities which are intended to increase the values of our two remaining major properties so that they can be sold at higher prices (than those achievable under their current entitlements) that will maximize distributions to our shareholders during the liquidation process within a reasonable period of time. Gyrodyne intends to dissolve after it completes the disposition of all of its real property assets, applies the

proceeds of such dispositions first to settle any debts and claims, pending or otherwise, against Gyrodyne, and then makes liquidating distributions to holders of Gyrodyne common shares. To accomplish this, the Company's plan consists of:

- managing the real estate portfolio to improve operating cash flow while simultaneously increasing the market values of the underlying properties;
- managing the opportunistic sale of real estate assets;
- pursuing the entitlement/re-zoning efforts of the Flowerfield and Cortlandt Manor properties, to maximize value;
- focusing use of capital by the Company to preserve or improve the market value of the real estate portfolio; and
- balancing working capital and funds available for the entitlement process with making distributions during the liquidation process.

Gyrodyne's strategy is to enhance the value of Flowerfield and Cortlandt Manor by pursuing possible entitlement and/or zoning opportunities, which the Gyrodyne Board believes will improve the chances of obtaining better values for such properties. The value of the real estate reported in the Statements of Net Assets as of September 30, 2017 and December 31, 2016 (predicated on current asset values) does not include any potential value impact that may result from such value enhancement efforts. There can be no assurance that our value enhancement efforts will result in property value increases that exceed the costs we incur in such efforts, or even any increase at all. The pursuit of the highest and best use of Flowerfield and Cortlandt Manor may involve the acquisition of properties, pursuit of joint venture relationships and other investments and or other strategies to maximize the returns for our shareholders. The Company does not expect the acquisition of properties or the pursuit of joint ventures, if any, to adversely affect the timing of the distributions to our shareholders. Gyrodyne intends to dissolve after it completes the disposition of all of its real property assets, applies the proceeds of such dispositions first to settle any debts and claims, pending or otherwise, against Gyrodyne, and then makes liquidating distributions to holders of Gyrodyne common shares. We are unable to predict the precise nature, amount or timing of such distributions.

The Company is making tenant improvements at Flowerfield to convert certain existing industrial space into office space to meet our expanding relationship with Stony Brook University, which the Company believes will enhance the value of the property as a whole by improving the building space and drawing a high quality long-term tenant. It would also increase the synergy with the University and allow for a portion of the trip generation from this office space to be accommodated using the internal access point between the properties. The Company believes that the planned tenant improvements will cost approximately \$840,000 and that we will likely finance the cost of such tenant improvements with a credit facility, rather than using our cash on hand. There can be no assurance that the Company will be able to secure financing on terms that are financially prudent, or that any resulting increase in value of the Flowerfield property will exceed the cost of our planned tenant improvements including the cost of any related financing.

Sales of properties by Gyrodyne could take the form of individual sales of assets, as has been our recent experience in Port Jefferson, sales of groups of assets, a single sale of all or substantially all of the assets or some other form of sale. The assets may be sold to one or more purchasers in one or more transactions over a period of time.

A sale of substantially all of the assets of the Company would require shareholder approval under New York law. The prices at which the various assets may be sold depend largely on factors beyond our control, including, without limitation, the condition of financial markets, the availability of financing to prospective purchasers of the assets, regulatory approvals, public market perceptions, and limitations on transferability of certain assets.

We cannot give any assurance on the timing of the ultimate sale of all of the Company's properties. Assuming the liquidation process continues through the end of 2018, and giving effect to the estimated cash flow from the operation of our existing properties, we expect that Gyrodyne will have a cash balance of approximately \$26.0 million, without giving effect to any future distributions, based on the estimate of net assets in liquidation presented in our Consolidated Statements of Net Assets. Such cash would equate to future liquidating distribution of approximately \$17.53 per share based on Gyrodyne, LLC having 1,482,680 common shares outstanding. These estimated distributions are based on values at September 30, 2017 and do not include any potential value that may be derived from the entitlement costs being incurred to maximize the value on Flowerfield and Cortlandt Manor. While the real estate market is dynamic, and the economy is volatile, the Company believes the estimated remaining entitlement costs of \$2.04 million will improve the estimated distributions versus selling the real estate under its current zoning and entitlements.

The Statements of Net Assets are based on certain estimates. Uncertainties as to the precise value of our non-cash assets, which exclude any estimated additional value achievable from the costs incurred to pursue the maximum value of the Flowerfield and Cortlandt Manor properties through certain land entitlement efforts (inclusive of the pursuit of special permits and or zone changes) and the ultimate amount of our liabilities make it impracticable to predict the aggregate net value ultimately distributable to shareholders during the liquidation process. Land entitlement costs, claims, liabilities and expenses from operations, including operating costs, salaries, income taxes, payroll and local taxes, legal, accounting and consulting fees and miscellaneous office expenses, will continue to be incurred during our liquidation process, which includes certain enhancement efforts. Excluding the value that may be achieved from the entitlement efforts, expenses incurred in pursuing the Company's business plan will reduce the amount of assets available for ultimate distribution to shareholders, and, while a precise estimate of those expenses cannot currently be made, management and our Board believe that available cash and amounts received on the sale of assets will be adequate to provide for our obligations, liabilities, expenses and claims (including contingent liabilities) and to make cash distributions to shareholders. However, no assurances can be given that available cash and amounts received on the sale of assets will be adequate to provide for

our obligations, liabilities, expenses and claims and to make cash distributions to shareholders. If such available cash and amounts received on the sale of assets are not adequate to provide for our obligations, liabilities, expenses and claims, distributions of cash and other assets to our shareholders will be reduced and could be eliminated.

### 3. Principles of Consolidation

The consolidated financial statements include the accounts of Gyrodyne, LLC and all subsidiaries. All consolidated subsidiaries are wholly-owned. All inter-company balances and transactions have been eliminated.

### 4. Basis of Quarterly Presentations

The accompanying quarterly financial statements have been prepared in conformity with accounting principles generally accepted in the United States ("GAAP"). The financial statements of the Company included herein have been prepared by the Company pursuant to the rules and regulations of the SEC and, in the opinion of management, reflect all adjustments which are necessary to present fairly the results for the nine-months ended September 30, 2017.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations; however, management believes that the disclosures are adequate to make the information presented not misleading.

### 5. Significant Accounting Policies

Gyrodyne is pursuing the opportunistic disposition of certain properties and the enhancement of the value of the Flowerfield and Cortlandt Manor properties, by pursuing various zoning/entitlement opportunities, which the Gyrodyne Board believes will improve the chances of obtaining better values for such properties. Gyrodyne intends to dissolve after it completes the disposition of all its real property assets, applies the proceeds of such dispositions first to settle any debts and claims, pending or otherwise, against Gyrodyne, and then makes liquidating distributions to holders of Gyrodyne common shares. Therefore, effective September 1, 2015 Gyrodyne adopted the liquidation basis of accounting. This basis of accounting is considered appropriate when, among other things, liquidation of the entity is imminent, as defined in ASC 205-30, Presentation of Financial Statements Liquidation Basis of Accounting. Under the LLC Agreement, the Board may elect, in its sole discretion and without any separate approval by the shareholders, to dissolve the Company at any time the value of the Company's assets, as determined by the Board in good faith, is less than \$1 million. The LLC Agreement also provides that the Company will dissolve, and its affairs wound up upon the sale, exchange or other disposition of all of the real properties of the Company. As a result, liquidation is "imminent" in accordance with the guidance provided in ASC 205-30.

***Basis of Presentation - Liquidation Basis of Accounting*** – Under the liquidation basis of accounting the consolidated balance sheet, consolidated statement of operations, consolidated statement of equity, consolidated statement of comprehensive income and the consolidated statement of cash flows are no longer presented. The consolidated statement of net assets and the consolidated statement of changes in net assets are the principal financial statements presented under the liquidation basis of accounting.

Under the liquidation basis of accounting, all the Company's assets have been stated at their estimated net realizable value, or liquidation value, (which represents the estimated amount of cash that Gyrodyne will collect on the disposal of assets as it carries out the plan of liquidation), which is based on current contracts, estimates and other indications of sales value. All liabilities of the Company, including those estimated costs associated with implementing the plan of liquidation, have been stated at their estimated settlement amounts. These amounts are presented in the accompanying Statements of Net Assets. These estimates are periodically reviewed and adjusted as appropriate. There can be no assurance that these estimated values will be realized. Such amounts should not be taken as an indication of the timing or amount of future distributions or our actual dissolution. The valuation of assets at their net realizable value and liabilities at their anticipated settlement amount represent estimates, based on present facts and circumstances, of the net realizable value of the assets and the costs associated with carrying out the plan of liquidation. The actual values and costs associated with carrying out the plan of liquidation may differ from amounts reflected in the accompanying financial statements because of the Plan's inherent uncertainty. These differences may be material. In particular, the estimates of our costs will vary with the length of time necessary to complete the plan of liquidation, which is currently anticipated to be the end of 2018. Accordingly, it is not possible to predict with certainty the timing or aggregate amount which may ultimately be distributed to common shareholders and no assurance can be given that the distributions will equal or exceed the estimate presented in the accompanying Statements of Net Assets.

The Company is pursuing value associated with the highest and best use for the Flowerfield property and the Cortlandt Medical Center. The actual costs of achieving such values may differ materially from the assumptions and estimates utilized and accordingly, could have a significant impact on the value of net assets in liquidation.

The Company's assumptions and estimates (including the sales proceeds of all its real estate holdings, selling costs, retention bonus payments, rental revenues, rental expenses, capital expenditures, land entitlement costs, general and administrative fees, director and officer liability and reimbursement, post liquidation insurance tail coverage policy and final liquidation costs) are based on completing the liquidation by the end of 2018. As previously stated, on an ongoing basis, Gyrodyne evaluates the estimates and assumptions that can have a significant impact on the reported net assets in liquidation and will update accordingly for any costs and value associated with a change in the duration of the liquidation, as we cannot give any assurance on the timing of the ultimate sale of all the Company's properties.

**Management Estimates** – In preparing the consolidated financial statements in conformity with U.S. Generally Accepted Accounting Principles (“GAAP”) and the liquidation basis of accounting, management is required to make estimates and assumptions that affect the reported amounts of assets, including net assets in liquidation, and liabilities and disclosure of contingent assets and liabilities as of the date of the consolidated financial statements and the reported amounts of receipts and expenditures for the reporting period. Actual results could differ from those estimates.

The most significant estimates are the estimates on the net realizable value from the sale of our real estate, the estimated costs/time to pursue entitlements/change of zone and the related timeline to complete the liquidation.

**Estimated Distributions per Share** – Under the liquidation basis of accounting, the Company reports estimated distributions per share data by dividing net assets in liquidation by the number of shares outstanding.

This report should be read in conjunction with the audited financial statements and footnotes therein included in the Annual Report on Form 10-K for the year ended December 31, 2016.

## **6. Statements of Net Assets (Liquidation Basis)**

The Company reports its financial results on the Statements of Net Assets and the Statement of Changes in Net Assets, both of which track the Company’s estimated remaining liquidating distributions.

Net assets in liquidation at September 30, 2017 would result in estimated liquidating distributions of approximately \$17.53 per common share. This is a decrease of \$1.43 from the December 31, 2016 net assets in liquidation of \$18.96 per common share which was mainly the result of a \$1.00 per share special distribution declared on June 16, 2017 and paid on July 7, 2017 and the tenant improvements required for a lease expansion with an existing tenant in the industrial park.

The cash balance at the end of the liquidation period (currently estimated to be December 31, 2018, although there can be no assurance that the liquidation process won’t end up taking longer to complete), excluding any interim distributions, is estimated based on the September 30, 2017 cash balance of \$5.9 million plus adjustments for the following items which are estimated through December 31, 2018:

1. Adjustments for the estimated cash receipts from the operation of the properties net of rental property related expenditures as well as costs expected to be incurred to preserve or improve the net realizable value of the property at its estimated gross sales proceeds.
2. Proceeds from the sale of all the Company’s real estate holdings.
3. The net cash used to settle the working capital accounts and distributions announced.
4. The general and administrative expenses and or liabilities associated with operations and the liquidation of the Company including severance, director and officer liability inclusive of post liquidation tail policy coverage, and financial and legal fees to complete the liquidation.
5. Costs for the pursuit of the entitlement/rezoning of the Flowerfield and Cortlandt Manor properties, to maximize value.
6. Estimated amounts payable under the Retention Bonus Plan (See Note 12) based on the net realizable value of the real estate.

The Company estimates the net realizable value of its real estate assets by using income and market valuation techniques. The Company may estimate net realizable values using market information such as broker opinions of value, appraisals, and recent sales data for similar assets or discounted cash flow models, which primarily rely on Level 3 inputs. The cash flow models include estimated cash inflows and outflows over a specified holding period. These cash flows may include contractual rental revenues, projected future rental revenues and expenses and forecasted tenant improvements and lease commissions based upon market conditions determined through discussion with local real estate professionals, experience the Company has with its other owned properties in such markets and expectations for growth. Capitalization rates and discount rates utilized in these models are estimated by management based upon rates that management believes to be within a reasonable range of current market rates for the respective properties based upon an analysis of factors such as property and tenant quality, geographical location and local supply and demand observations. To the extent the Company under estimates forecasted cash outflows (tenant improvements, lease commissions and operating costs) or over estimates forecasted cash inflows (rental revenue rates), the estimated net realizable value of its real estate assets could be overstated.

The Company is pursuing various avenues to maximize total distributions to our shareholders during the liquidation process. The Company estimates that it will incur approximately \$2.04 million (included in the Statements of Net Assets as part of the estimated liquidation and operating costs net of receipts, See Note 7) in land entitlement costs between October 2017 and the end of 2018, inclusively, in an effort to obtain entitlements, inclusive of zone changes and special permits. The Company believes the commitment of these resources will enable the Company to position the properties for sale with all entitlements necessary to maximize the Flowerfield and Cortlandt Manor property values. During the first nine months of 2017, the Company incurred approximately \$1.4 million of land entitlement costs, of which approximately \$343,000 was for the purchase of a single-family residence on a .3-acre lot of adjacent land to the Cortlandt Manor Medical Center, inclusive of closing costs. The Company believes the remaining balance of \$2.04 million will be incurred from October 2017 through the end of liquidation. The Company does not intend to develop the properties but rather to commit resources to position the properties for sale in a timely manner with all entitlements necessary to achieve maximum pre-construction values. The costs and time frame to achieve the entitlements could change due to a range of factors including a shift in the value of certain entitlements making it more profitable to pursue a different mix of zones/entitlements and the dynamics of the real estate market. As a result, the Company has focused and will continue to focus its land entitlement efforts on achieving the highest and best use. During the process of pursuing such entitlements, the Company may nevertheless entertain offers from potential buyers who may be willing to pay premiums for the properties that the Company finds more acceptable from a timing or value perspective than completing the entitlement processes itself. The value of the real estate reported in the Statements of Net Assets as of September 30, 2017 and December 31, 2016 (predicated on current asset values) does not include any potential value impact that may result from the estimated \$2.04 million in land entitlement costs. There can be no assurance that our value enhancement efforts will result in property value increases that exceed the costs we incur in such efforts, or even any increase at all.

The Company is making tenant improvements at Flowerfield to convert certain existing industrial space into office space to meet our expanding relationship with Stony Brook University, which the Company believes will enhance the value of the property as a whole by improving the building space and drawing a high quality long-term tenant. It would also increase the synergy with the University and allow for a portion of the trip generation from this office space to be accommodated using the internal access point between the properties. The Company believes that the planned tenant improvements will cost approximately \$840,000 and that we will likely finance the cost of such tenant improvements with a credit facility, rather than using our cash on hand. There can be no assurance that the Company will be able to secure financing on terms that are financially prudent, or that any resulting increase in value of the Flowerfield property will exceed the cost of our planned tenant improvements including the cost of any related financing.

The net assets in liquidation at September 30, 2017 and December 31, 2016 of \$25,991,825 and \$28,111,612, respectively, results in estimated liquidating distributions of approximately \$17.53 and \$18.96 per common share (based on 1,482,680 shares outstanding), respectively, based on estimates and other indications of sales value but excluding any actual additional sales proceeds that may result directly or indirectly from the anticipated \$2.04 million in land entitlement costs. Neither the additional value that may be derived from the land entitlement costs, nor the bonuses that would be payable under the Company's retention bonus plan in connection with the sale of the Flowerfield and Cortlandt Manor properties are included in the estimated liquidating distributions as of September 30, 2017 and December 31, 2016. The Company believes the land entitlement costs will enhance estimated distributions per share through the improved values from the sales of the Flowerfield and Cortlandt Manor properties. This estimate of liquidating distributions includes projections of costs and expenses to be incurred during the period required to complete the plan of liquidation. There is inherent uncertainty with these projections, and they could change materially based on the timing of the sales, improved values of the Cortlandt Manor and/or Flowerfield properties resulting from the land entitlement efforts net of any bonuses if such values exceed the minimum values required to pay bonuses under the retention bonus plan, favorable or unfavorable changes in the land entitlement costs, the performance of the underlying assets, the market for commercial real estate properties generally and any changes in the underlying assumptions of the projected cash flows.

## **7. Liability for Estimated Costs in Excess of Receipts during Liquidation**

The liquidation basis of accounting requires the Company to estimate net cash flows from operations and to accrue all costs associated with implementing and completing the plan of liquidation. The Company currently estimates that it will incur costs in excess of estimated receipts during the liquidation period, excluding the net proceeds from the real estate sales. These amounts can vary significantly due to, among other things, land entitlement costs, the timing and estimates for executing and renewing leases, capital expenditures to maintain the real estate at its current fair value and estimates of

tenant improvement costs, the timing of property sales and any direct/indirect costs incurred that are related to the sales (e.g., retention bonuses on the sale of the Cortlandt Manor and Flowerfield properties, costs to address buy side due diligence inclusive of administrative fees, legal fees and property costs to address items arising from such due diligence and not previously known), the timing and amounts associated with discharging known and contingent liabilities and the costs associated with the winding up of operations. These costs are estimated and are anticipated to be paid during the liquidation period.

The change in the liability for estimated costs in excess of estimated receipts during liquidation from January 1, 2017 through September 30, 2017 is as follows:

	January 1, 2017	Expenditures/ (Receipts)	Remeasurement of Assets and Liabilities	September 30, 2017
Assets:				
Estimated rents and reimbursements	\$ 4,587,606	\$ (2,041,328)	\$ 318,985	\$ 2,865,263
Liabilities:				
Property operating costs	(2,171,863)	1,146,190	(420,035)	(1,445,708)
Capital expenditures excluding land entitlement costs and land purchases	(840,000)	358,221	(955,710)	(1,437,489)
Land entitlement costs	(3,358,200)	1,374,255	(57,693)	(2,041,638)
Corporate expenditures	(6,225,694)	1,863,830	79,780	(4,282,084)
Selling costs on real estate assets	(1,861,500)	209,355	(68,355)	(1,720,500)
Retention bonus payments to Directors (a)	(234,632)	197,633	(6,498)	(43,497)
Retention bonus payments to Executives and other employees (a)	(126,340)	106,419	(3,499)	(23,420)
Less prepaid expenses and other assets	345,512	32,414	-	377,926
Liability for estimated costs in excess of estimated receipts during liquidation	<u>\$ (9,885,111)</u>	<u>\$ 3,246,989</u>	<u>\$ (1,113,025)</u>	<u>\$ (7,751,147)</u>

(a) The value of the real estate reported in the Statements of Net Assets as of September 30, 2017 and December 31, 2016, (predicated on current asset values) does not include any potential value impact that may result from the estimated land entitlement costs. There can be no assurance that our value enhancement efforts will result in property value increases that exceed the costs we incur in such efforts, or even any increase at all. As a result, net realizable value as reported does not exceed the adjusted appraised value under the Company's retention bonus plan (the appraisal of the real estate in late 2013 plus the estimated entitlement costs) for the Flowerfield and Cortlandt Manor properties and accordingly the Company has not included any retention bonuses on the respective property sales in the calculation of estimated costs in excess of estimated receipts.

## 8. Disposition Activities

Port Jefferson Professional Park. On June 15, 2017, Gyrodyne, LLC, through its wholly owned subsidiary GSD Port Jefferson, LLC, completed the sale of the two buildings located at 9 Medical Drive and 5380 Nesconset Highway, respectively, in the Port Jefferson Professional Park for an aggregate purchase price of \$2,000,000 pursuant to the previously announced Purchase and Sale Agreement dated as of March 30, 2017.

On August 4, 2017, Gyrodyne, LLC, through its wholly owned subsidiary GSD Port Jefferson, LLC, completed the sale of the building located at 1 Medical Drive in the Port Jefferson Professional Park for a purchase price of \$800,000 pursuant to the previously announced Purchase and Sale Agreement dated as of May 23, 2017.

The Company has one remaining building comprising approximately 3,500 square feet within the same medical park which is being actively marketed for sale.

## 9. Investment in Marketable Securities

Under the liquidation basis of accounting, the statements of net assets reports all assets at net realizable value and any changes in such values during a period are reported in the consolidated statement of changes in net assets.

The Company reviews its investments on a regular basis and adjusts the balance to fair value in the Consolidated Statement of Changes in Net Assets and Statements of Net Assets, accordingly.

The estimated net realizable value of investments in marketable securities available for sale as of December 31, 2016 was \$4,087,231. The Company received principle payments of \$129,587 prior to the sale of 100% of its investment in mortgage-backed securities for approximately \$3,983,562 during the nine-months ended September 30, 2017.

The Company's investment was in conforming agency fixed rate mortgage pass through securities ("mortgage-backed securities"), each of which contained either AA or AAA ratings, the principal of which is fully guaranteed by agencies of the U.S. Government. At December 31, 2016, marketable securities based on amortized cost, reflected a yield of approximately 2%, had contractual maturities of 15 or 30 years and an adjusted duration of less than four years. The fair value of mortgage-backed securities was estimated based on a Level 2 methodology, additional details of which are discussed further in Footnote 15 – Fair Value of Financial Instruments. Prior to their sale, all securities were reported at fair value and the changes were reported in the statements of net assets and the statement of changes in net assets, accordingly.

## 10. Income Taxes

Gyrodyne LLC is not subject to an entity level income tax but rather is treated as a partnership for tax purposes, with its items of income, gain, deduction, loss and credit being reported on the Company's information return, on Form 1065, and allocated annually on a Schedule K-1 to its members pro rata. Flowerfield Properties, Inc. ("FPI") is a wholly-owned subsidiary of the Company. FPI is a "C" corporation and therefore any income generated by FPI is subject to a corporate level tax.

Under current law, when the IRS audits a partnership tax return, the IRS generally determines tax adjustments at the partnership level, but is required to collect any additional taxes, interest and penalties from each of the partners.

The Bipartisan Budget Act of 2015 (the "2015 Act") changed this procedure for partnership tax audits and audit adjustments for partnership returns of large partnerships for fiscal years beginning after December 31, 2017. Pursuant to the 2015 Act, if any audit by the IRS of our income tax returns for any taxable year beginning after December 31, 2017 results in any adjustments, the IRS may collect any resulting taxes, including any applicable penalties and interest, directly from Gyrodyne. IRS tax audit assessments on tax years beginning on or after January 1, 2018 will require Gyrodyne and, indirectly, its members, to bear any tax liability resulting from such audit, unless we elect, once the tax adjustments have been calculated at the Company level to "push out" such tax audit adjustments to those persons who were members of the Company during the taxable year(s) to which the tax liability relates, in which case an increased interest charge will be applied to the tax deficiency.

The nine months ended September 30, 2017 and the year ended December 31, 2016 Statements of Net assets include a tax benefit in other costs in excess of receipts comprised of Federal and State tax current receivables of \$0 and \$19,749, respectively, and the federal and state benefit of approximately \$85,000 directly related to the potential net operating loss carryback benefit if The Grove does not make any future distribution. In the event distributions are received, the tax benefit would be reduced accordingly at an effective rate of 39%.

## 11. Concentration of Credit Risk

Financial instruments, which potentially subject the Company to concentrations of credit risk, consist principally of cash and cash equivalents and securities issued with the guarantee of U.S. Government Agencies. The Company places its temporary cash investments with high credit quality financial institutions and generally limits the amount of credit exposure in any one financial institution. However, while the Company maintains bank account balances which at times exceed insured limits, the Company has not experienced any losses to date. Management does not believe significant credit risk existed at September 30, 2017 and December 31, 2016.

For the nine-months ended September 30, 2017 rental income from the three largest tenants represented approximately 16%, 10% and 8% of total rental income. The three largest tenants by revenue as of September 30, 2017 consist of a state agency located in the industrial park, a medical tenant in the Cortlandt Manor Medical Center and another tenant in the industrial park. The tenant in the industrial park that represents 8% of the total rental income terminated their lease as of August 31, 2017. The impact of which is included in the estimated liquidation and operating costs net of receipts. We expect to be increasing the space to be leased to the state agency which will increase the concentration of credit risk respectively.

## 12. Commitments

Other commitments as of September 30, 2017 are summarized in the below:

Management Employment agreements with bonus and severance commitment contingencies	\$ 350,000
Other employee severance commitment contingencies	114,200
Total	\$ 464,200

***Employment agreements*** - The Board of Directors appointed Gary Fitlin as President and Chief Executive Officer effective May 1, 2017. Mr. Fitlin has an employment agreement (the “Agreement”), executed during the quarter ended June 30, 2013. The Agreement contains a bonus of \$125,000 payable to him if he is employed by the Company as of the effective date of a change-in-control as defined in the Agreement. If he is terminated without cause, the Company must provide him with at least 60 days’ prior written notice of termination, and must pay him the change-in-control bonus and severance pay equal to six months’ base salary from the date of termination.

The Company also has an employment agreement with Peter Pitsiokos, its Chief Operating Officer, executed on May 8, 2014 which provides that if he is terminated without cause, the Company must pay him severance pay equal to six months' base salary from the date of termination.

Under Company policy the aggregate severance commitment contingency to other employees is approximately \$114,200.

**Retention Bonus Plan-** In May 2014, the Board of Directors approved a Retention Bonus Plan designed to recognize the nature and scope of the responsibilities related to the Company's business plan, to reward and incent performance in connection therewith, to align the interests of directors, executives and employees with our shareholders and to retain such persons during the liquidation process. The Retention Bonus Plan provides for bonuses to directors, officers and employees determined by the gross sales proceeds from the sale of each property.

The Retention Bonus Plan initially provided for a bonus pool funded with an amount equal to 5% of the specified appraised value of such properties (set forth in the plan), so long as the gross selling price of a property is equal to or greater than 100% of its 2013 appraised value as designated in the bonus plan. The aggregate amount of the 2013 appraisals for the Company's properties was utilized to help set the aggregate valuation of the real estate that was included in the non-cash dividend distributed on December 30, 2013. Additional funding of the bonus pool will occur on a property-by-property basis when the gross sales price of a property exceeds its appraised value as follows: 10% on the first 10% of appreciation, 15% on the next 10% of appreciation and 20% on appreciation greater than 20%.

The bonus pool is distributable in the following proportions to the named participants in the Retention Bonus Plan for so long as they are directors or employees of the Company: 15% for the Chairman, 50% for the directors other than the Chairman (10% for each of the other five directors) and 35% (the "Employee Pool") for the Company's executives and employees. Such share of the bonus pool is earned only upon the completion of the sale of a property at a gross selling price equal to or greater than its appraised value and is paid to the named beneficiaries of the Retention Bonus Plan or their designees within 60 days of the completion of such sale or, if later, within 60 days of receipt of any subsequent post-completion installment payment related to such sale. All allocations to individual beneficiaries of the Employee Pool shall be determined by the Board of Directors of the Company or its successor in consultation with its President.

On May 24, 2016, the Board of Directors amended its Retention Bonus Plan to provide that land entitlement costs incurred on a property since the date of the 2013 appraisal will be added to that value of the property ("Adjusted Appraised Value") in calculating appreciation for determining the bonus pool. The foregoing change was approved to better align the interests of the participants in the Retention Bonus Plan with those of the shareholders. The amendment also provides that each of the ten buildings in the Port Jefferson Professional Park will be treated as a "property", so that a participant's right to bonus payment on the sale of a Port Jefferson building will vest on, and payments to the bonus pool may be made shortly following, the closing of the sale of that building. As originally adopted, all ten buildings in the Port Jefferson Professional Park were treated as one property, so that a participant departing prior to the sale of all ten buildings would forfeit bonus on all ten buildings. The reason for this original designation was that, at the time of adoption, the Board of Directors believed that Gyrodyne's entire Port Jefferson property would be sold as one block, not as individual buildings. Subsequent to adoption, the Gyrodyne Board decided that the sale of individual buildings would generate the greatest aggregate values and thus would be in the best interests of the Company and its shareholders.

The value of the real estate reported in the Statements of Net Assets as of September 30, 2017 and December 31, 2016, (predicated on current asset values) does not include any potential value impact that may result from the estimated land entitlement costs. There can be no assurance that our value enhancement efforts will result in property value increases that exceed the costs we incur in such efforts, or even any increase at all. As a result, net realizable value as reported does not exceed the Adjusted Appraised Value under the Retention Bonus Plan on the Cortlandt Manor and Flowerfield properties and accordingly the Company has not included any retention bonuses on the respective property sales in the calculation of estimated costs in excess of receipts.

Payments made during the nine-months ended September 30, 2017 under the Retention Bonus Plan relating to the sales of three buildings in the Port Jefferson Professional Park were as follows:

Retention Bonus Plan Participants	Total
Board of Directors	\$ 197,633
Chief Executive Officer	50,898

Chief Operating Officer	46,863
Other Employees	8,658
Total	\$ 304,052

**Master Lease** - The Company retained a Master lease obligation under the terms of the sale of Fairfax Medical Center which expires May 3, 2018. The remaining maximum total obligation of \$50,593, to the purchaser is based on approximately 3,852 square feet. The obligation will be reduced by any new leases or expansions signed by the buyer, which obligations will terminate if the financial obligation is satisfied through leases to one or more third party tenants.

### 13. Contingencies

#### *Putative Class Action Lawsuit*

On July 3, 2014, a purported stockholder of Gyrodyne Company of America, Inc. (the "Corporation") filed a putative class action lawsuit against the Corporation and members of its Board of Directors (the "Individual Defendants"), and against Gyrodyne Special Distribution, LLC ("GSD") and the Company (collectively, the "Defendants"), in the Supreme Court of the State of New York, County of Suffolk (the "Court"), captioned *Cashstream Fund v. Paul L. Lamb, et al.*, Index No. 065134/2014 (the "Action"). The complaint alleged, among other things, that (i) the Individual Defendants breached their fiduciary duties or aided and abetted the breach of those duties in connection with the merger of the Corporation and GSD into the Company (the "Merger") and (ii) the Corporation and the Individual Defendants breached their fiduciary duties by failing to disclose material information in the proxy statement/prospectus relating to the Merger.

On August 14, 2015, the parties to the Action entered into a Stipulation of Settlement (the "Settlement") providing for the settlement of the Action, subject to the Court's approval. Under the Settlement, the Corporation and the Company amended the proxy statement/prospectus on August 17, 2015 with certain supplemental disclosures, and agreed that any sales of its properties would be effected only in arms'-length transactions at prices at or above their appraised values as of December 2014. The plaintiff, on behalf of itself and the members of the putative class it represented, agreed to release and dismiss with prejudice all claims that had or could have been asserted in the Action or in any other forum against the Defendants and their affiliates and agents arising out of or relating to the Merger and the other transactions alleged by plaintiff in its complaint, as supplemented. On April 8, 2016, the Court entered a Final Order and Judgment approving the Settlement. By order of the same date, the Court also granted plaintiff's application for an award of attorney's fees and reimbursement of expenses in the amount of \$650,000 which was paid in full in April 2016.

As of September 30, 2017, the aggregate value, based on the 2016 appraisals, of the remaining unsold properties was \$150,000 lower than the 2014 appraised values.

#### *General*

In the normal course of business, the Company is a party to various legal proceedings. After reviewing all actions and proceedings pending against or involving the Company, management considers that any loss resulting from such proceedings individually or in the aggregate will not be material to the Company's financial statements.

### 14. Recent Accounting Pronouncements

Management has evaluated the impact of newly issued accounting pronouncements, whether effective or not as of September 30, 2017, and has concluded that they will not have a material impact on the Company's consolidated financial statements since the Company reports on a liquidation basis.

### 15. Fair Value of Financial Instruments

**Assets and Liabilities Measured at Fair-Value** – The Company believes the concepts for determining net realizable value are consistent with the guidance for measuring fair value. As a result, the Company follows authoritative guidance on fair value measurements, which defines fair-value, establishes a framework for measuring fair-value, and expands disclosures about fair-value measurements. The guidance applies to reported balances that are required or permitted to be measured at fair-value under existing accounting pronouncements.

The Company follows authoritative guidance on the fair value option for financial assets, which permits companies to choose to measure certain financial instruments and other items at fair-value in order to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently. However, the Company adopted the liquidation basis of accounting, and therefore reports all assets and liabilities at net realizable value.

The guidance emphasizes that fair-value is a market-based measurement, not an entity-specific measurement. Therefore, a fair-value measurement should be determined based on the assumptions that market participants would use in pricing the

asset or liability. As a basis for considering market participant assumptions in fair-value measurements, the guidance establishes a fair-value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity's own assumptions about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy). In instances where the determination of the fair-value measurement is based on inputs from different levels of the fair-value hierarchy, the level in the fair-value hierarchy within which the entire fair-value measurement falls is based on the lowest level input that is significant to the fair-value measurement in its entirety. Our assessment of the significance of a particular input to the fair-value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

During the nine-months ended September 30, 2017, the company received \$4,113,149 through principal debt service and the sale of 100% of its investment in mortgage backed securities which exceeded the net realizable value of the Company's investment in marketable securities as of December 31, 2016 of \$4,087,231. The Company's investments in marketable securities were limited to mortgage backed securities which had either AA or AAA ratings fully guaranteed by US government agencies (the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation). The net realizable values of mortgage backed securities originated by US government agencies are based on a pricing model that incorporates coupon type, prepayment speeds and the type of collateral backing the securities. A discount rate is applied to the cash flows in the model to arrive at the net realizable value. Market quotes, current yields, and their spreads to benchmark indices are obtained for each type of security. With this data, a yield curve is derived for each category of mortgage backed securities. Each security is priced by discounting the cash flow stream by the appropriate yield found on the yield curve. As the significant inputs used to derive the value of the mortgage-backed securities are observable market inputs, the net realizable value of these securities is included in the Level 2 fair value hierarchy.

#### Fair Value Measurements:

The Company adopted the liquidation basis of accounting effective September 1, 2015; accordingly, the Company reports all real estate at their net realizable value.

The Company estimates the net realizable value of its real estate assets by using income and market valuation techniques. The Company may estimate net realizable values using market information such as broker opinions of value, appraisals, and recent sales data for similar assets or discounted cash flow models, which primarily rely on Level 3 inputs. The cash flow models include estimated cash inflows and outflows over a specified holding period. These cash flows may include contractual rental revenues, projected future rental revenues and expenses and forecasted tenant improvements and lease commissions based upon market conditions determined through discussion with local real estate professionals, experience the Company has with its other owned properties in such markets and expectations for growth. Capitalization rates and discount rates utilized in these models are estimated by management based upon rates that management believes to be within a reasonable range of current market rates for the respective properties based upon an analysis of factors such as property and tenant quality, geographical location and local supply and demand observations. To the extent, the Company under estimates forecasted cash outflows (tenant improvements, lease commissions and operating costs) or over estimates forecasted cash inflows (rental revenue rates), the estimated net realizable value of its real estate assets could be overstated.

The following table presents the Company's assets and liabilities measured at fair value on a non-recurring basis as of September 30, 2017, aggregated by the level in the fair value hierarchy within which those measurements fall:

Description	Balance	Fair Value Measurements Using		
		(Level 1)	(Level 2)	(Level 3)
Real estate assets	\$ 28,675,000	\$ —	\$ —	\$ 28,675,000

The Company is a limited partner in Callery-Judge Grove, L.P. (the "Grove"), which is in the process of liquidation. The proceeds, if any, that the Company may receive effectively reflect an illiquid receivable and therefore there is no net realizable value included in the Company's Statements of Net Assets from this investment.

## 16. Related Party Transactions

In April 2016, Paul Lamb, the Chairman of the Board of Gyrodyne, LLC founded and became the Executive Chairman of the Board of Directors of a not-for-profit corporation under New York law in which he does not earn any compensation or receive any other financial benefit. In May 2016, the Company entered into a 30-month real property lease (which was extended an additional two months in April 2017) with such entity comprising 1,971 square feet and an annual and total lease commitment (inclusive of the extension) of \$16,754 and \$44,676, respectively. Approximately \$4,700 in improvements were provided by the Company. The Company believes the lease is at market value.

In April 2017, the Company entered into a new lease with the above not-for-profit entity. The leasing term of 20 months comprise an additional 1,905 square feet and annual and total additional lease commitments of \$16,193 and \$26,988, respectively. The Company believes the lease is at market value.

The above leases were approved unanimously by the board of the Company with Mr. Lamb recusing himself from deliberations and vote.

## 17. Subsequent Events

### *Amendment to Advisory Agreement:*

On November 7, 2017, the Company entered into an amendment to the board adviser agreement dated May 24, 2016 (the “Adviser Agreement”) between the Company and Jad Fakhry, Manager of Poplar Point Capital Management, LLC, Gyrodyne’s largest shareholder. The amendment (i) extends the expiration date of the Adviser Agreement from November 24, 2017 to November 24, 2018, (ii) expands the scope of Mr. Fakhry’s duties to include attendance at all Board meetings to which he is invited to attend, consulting with management and the Board on an as needed basis and advising the Board on the strategic process of liquidating the Company and maximizing shareholder value at any board meetings he is invited to attend, and (iii) increases Mr. Fakhry’s advisory fee from \$2,500 to \$7,500 per quarter.

## Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

When we use the terms “Gyrodyne,” the “Company,” “we,” “us,” and “our,” we mean Gyrodyne, LLC and all entities owned or controlled by us, including non-consolidated entities. References to “common shares” in this report refer to Gyrodyne, LLC’s common shares representing limited liability company interests. References herein to our Quarterly Report are to this Quarterly Report on Form 10-Q for the nine-months ended September 30, 2017.

*Cautionary Statement Concerning Forward-Looking Information.* This Quarterly Report and the documents incorporated by reference into this Quarterly Report contain forward-looking statements about the Company within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”) and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Statements containing the words “believes,” “anticipates,” “estimates,” “expects,” “intends,” “plans,” “seeks,” “will,” “may,” “should,” “would,” “projects,” “continues” and similar expressions or the negative of these terms constitutes forward-looking statements that involve risks and uncertainties. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and they are included in this Quarterly Report for the purpose of invoking these safe harbor provisions. Such statements are based on current expectations and are subject to risks, uncertainties and changes in condition, significance, value and effect. The risks, uncertainties and changes in condition, significance, value and effect that could cause the Company’s actual results to differ materially from anticipated results include risks and uncertainties relating to the plan of liquidation, the risk that the proceeds from the sale of our assets may not be sufficient to satisfy our obligations to our current and future creditors and retention bonus plan participants, the risk of shareholder litigation relating to the tax liquidation, the plan of liquidation or the plan of merger and other unforeseeable expenses related to the proposed liquidation, the tax treatment of condemnation and property sale proceeds, the effect of economic and business conditions, risks inherent in the real estate markets of Suffolk and Westchester Counties in New York, the ability to develop the Company’s existing real estate and other risks detailed from time to time in the Company’s SEC filings. Except as may be required under federal law, we undertake no obligation to update publicly any forward-looking statements for any reason, even if new information becomes available or other events occur.

### Overview

Gyrodyne, LLC (“Gyrodyne”, the “Company” or the “Registrant”) is a limited liability company formed under the laws of the State of New York whose primary assets are comprised of a geographically diverse portfolio of medical office and industrial properties located on Long Island and in Westchester County, New York.

Substantially all of our developed properties are subject to leases in which the tenant reimburses the Company for a portion, all of or substantially all of the costs and/or cost increases for utilities, insurance, repairs, maintenance and real estate taxes. Certain leases provide that the Company is responsible for certain operating expenses.

The Company manages its business as one operating segment. The Company’s corporate strategy is to pursue zoning and/or entitlement opportunities intended to increase the values of our two remaining major properties (Flowerfield and Cortlandt Manor) so that they can be sold at higher prices (than those achievable under their current entitlements) that

will maximize distributions to our shareholders during the liquidation process within a reasonable period of time and then dissolving the Company. The value of the real estate reported in the Statements of Net Assets as of September 30, 2017 and December 31, 2016 (predicated on current asset values) does not include any potential value impact that may result from such value enhancement efforts. There can be no assurance that our value enhancement efforts will result in property value increases that exceed the costs we incur in such efforts, or even any increase at all.

Our efforts to generate the highest values for Flowerfield and Cortlandt Manor may involve in limited circumstances the acquisition of certain adjacent properties, pursuit of joint venture relationships, entitlements and/or zoning changes, other investments and/or other strategies to enhance the net value of Flowerfield and Cortlandt Manor to maximize the returns for our shareholders. The Company does not expect the acquisition of properties or the pursuit of joint ventures, if any, to adversely affect the timing of distributions to our shareholders. Gyrodyne intends to dissolve after it completes the disposition of all of its real property assets, applies the proceeds of such dispositions first to settle any debts and claims, pending or otherwise, against Gyrodyne, and then makes liquidating distributions to holders of Gyrodyne common shares. The liquidation process and the amount and timing of distributions involve risks and uncertainties. As such, it is impossible at this time to determine the ultimate amount of proceeds that will actually be distributed to our shareholders or the timing of such payments. Accordingly, no assurance can be given that the distributions will equal or exceed the estimate of net assets in liquidation presented in our Consolidated Statements of Net Assets. The actual nature, amount and timing of all distributions will be determined by Gyrodyne's Board in its sole discretion, and will depend in part upon the ability to convert our remaining assets into cash in compliance with our obligations under the Stipulation entered into in connection with the class action lawsuit (See Note 13 – Contingencies) and settle and pay our remaining liabilities and obligations. Under Gyrodyne's Amended and Restated Limited Liability Company Agreement (the "LLC Agreement"), such dissolution may be effected upon the vote of holders of a majority of Gyrodyne common shares or, in the Board's discretion and without any separate approval by the holders of the Gyrodyne common shares, at any time the value of Gyrodyne's assets, as determined by the Board in good faith, is less than \$1,000,000.

After giving effect to the Company's dispositions of real property (See Note 8), the Company owns one remaining medical office park and one of fourteen buildings in a second medical office park, together comprising approximately 37,000 rentable square feet and a multitenant industrial park comprising approximately 130,000 rentable square feet. The aforementioned industrial park is situated on ten acres of a 68-acre property in St. James, New York, all of which is owned by the Company. The medical office park in Cortlandt Manor, the building in the Port Jefferson Professional Park and the Flowerfield Industrial Park (including its undeveloped portion) are individually owned in single asset LLCs wholly owned by the Company.

#### **Strategic Plan to Enhance Property Values, Liquidate and Dissolve**

Our corporate strategy is to pursue zoning and/or entitlement opportunities intended to increase the values of our two remaining major properties so that they can be sold at higher prices (than those achievable under their current entitlements) that will maximize distributions to our shareholders during the liquidation process within a reasonable period of time. Gyrodyne intends to dissolve after it completes the disposition of all of its real property assets, applies the proceeds of such dispositions first to settle any debts and claims, pending or otherwise, against Gyrodyne, and then makes liquidating distributions to holders of Gyrodyne common shares. To accomplish this, the Company's plan consists of:

- managing the real estate portfolio to improve operating cash flow while simultaneously increasing the market values of the underlying properties;
- managing the opportunistic sale of real estate assets;
- pursuing the re-zoning/entitlement efforts of the Flowerfield and Cortlandt Manor properties, to maximize value;
- focusing use of capital by the Company to preserve or improve the market value of the real estate portfolio; and
- balancing working capital and funds available for the entitlement process with making distributions during the liquidation process.

Sales of properties by Gyrodyne could take the form of individual sales of assets, as has been our recent experience in Port Jefferson, sales of groups of assets, a single sale of all or substantially all of the assets or some other form of sale. The assets may be sold to one or more purchasers in one or more transactions over a period of time.

A sale of substantially all of the assets of the Company would require shareholder approval under New York law. The prices at which the various assets may be sold depend largely on factors beyond our control, including, without limitation, the condition of financial markets, the availability of financing to prospective purchasers of the assets, regulatory approvals, public market perceptions, and limitations on transferability of certain assets.

We cannot give any assurance on the timing of the ultimate sale of all of the Company's properties. Assuming the liquidation process continues through the end of 2018, and giving effect to the estimated cash flow from the operation of our existing properties, we expect that Gyrodyne will have a cash balance of approximately \$26.0 million, prior to any future distributions based on the estimate of net assets in liquidation presented in our Consolidated Statements of Net

Assets. Such cash would equate to future liquidating distribution of approximately \$17.53 per share based on Gyrodyne LLC, having 1,482,680 common shares outstanding. These estimated distributions are based on values at September 30, 2017 (predicated on current asset values) does not include any potential value that may be derived from the entitlement costs being incurred to maximize the value on Flowerfield and Cortlandt Manor. There can be no assurance that our value enhancement efforts will result in property value increases that exceed the costs we incur in such efforts, or even any increase at all. While the real estate market is dynamic, and the economy is volatile, the Company believes the estimated remaining entitlement costs of \$2.04 million will improve the estimated distributions versus selling the real estate under its current zoning and entitlements.

The statements of net assets are based on certain estimates. Uncertainties as to the precise value of our non-cash assets, which exclude any estimated additional value achievable from the costs incurred to pursue the maximum value on Flowerfield and Cortlandt Manor through certain land entitlement efforts (inclusive of the pursuit of certain entitlements, special permits and or zone changes) and the ultimate amount of our liabilities make it impracticable to predict the aggregate net value ultimately distributable to shareholders in a liquidation. Land entitlement costs, claims, liabilities and expenses from operations, including operating costs, salaries, income taxes, payroll and local taxes, legal, accounting and consulting fees and miscellaneous office expenses, will continue to be incurred during our liquidation process, which includes certain enhancement efforts. Excluding the value that may be achieved from the entitlement efforts, expenses incurred in pursuing the Company's business plan will reduce the amount of assets available for ultimate distribution to shareholders, and, while a precise estimate of those expenses cannot currently be made, management and our Board believe that available cash and amounts received on the sale of assets will be adequate to provide for our obligations, liabilities, expenses and claims (including contingent liabilities) and to make cash distributions to shareholders. However, no assurances can be given that available cash and amounts received on the sale of assets will be adequate to provide for our obligations, liabilities, expenses and claims and to make cash distributions to shareholders. If such available cash and amounts received on the sale of assets are not adequate to provide for our obligations, liabilities, expenses and claims, distributions of cash and other assets to our shareholders will be reduced and could be eliminated.

### **Properties under contract or sold**

#### **Port Jefferson Professional Park**

On June 15, 2017, Gyrodyne, LLC, through its wholly owned subsidiary GSD Port Jefferson, LLC, completed the sale of the two buildings located at 9 Medical Drive and 5380 Nesconset Highway, respectively, in the Port Jefferson Professional Park for an aggregate purchase price of \$2,000,000 pursuant to the previously announced Purchase and Sale Agreement dated as of March 30, 2017.

On August 4, 2017, Gyrodyne, LLC, through its wholly owned subsidiary GSD Port Jefferson, LLC, completed the sale of the building located at 1 Medical Drive in the Port Jefferson Professional Park for a purchase price of \$800,000 pursuant to the previously announced Purchase and Sale Agreement dated as of May 23, 2017.

Following the sales indicated above, the Company has one remaining building (comprising approximately 3,500 square feet in total) within the same medical park which is being actively marketed for sale.

### **Property Value Enhancement**

The Company is pursuing entitlements/zoning to maximize the value of Flowerfield and Cortlandt Manor. During the nine months ending September 30, 2017, the Company incurred \$1.4 million of land entitlement costs, of which approximately \$343,000 was for the purchase, inclusive of closing costs, of a residential 0.3-acre lot adjacent to the Cortlandt Manor Medical Center. The balance was mainly attributable to preparing the respective applications for entitlements inclusive of certain costs related to addressing the State Environmental Quality Review Act ("SEQRA"). The preparation of the application is the first statutory step with each respective town, of our strategic plan to maximize the value to our shareholders with a low amount of risk. We anticipate that the acquired land will enhance the achievable density and sale value of the Cortlandt property. We estimate that the Company may incur approximately \$2.04 million in additional land entitlement costs through 2018 in pursuit of special permits and or zone changes (approximately \$554,000 in Cortlandt Manor and \$1,487,000 in Flowerfield).

The Company is focusing its resources on positioning the properties to be sold with all entitlements necessary to achieve maximum pre-construction values in the shortest period of time with the least amount of risk to the Company. During the process of pursuing such entitlements, the Company may entertain offers from potential buyers who may be willing to pay prices for the properties that the Company finds more attractive from a timing or value perspective than completing the entitlement processes. While the real estate market is dynamic and the economy is uncertain, we anticipate that these expenditures will serve to greatly increase the sale prices of the properties and the resulting liquidating distributions to our shareholders.

**Cortlandt Manor.** On March 15, 2016, the Town of Cortlandt Manor (the "Town") adopted a 2016 Sustainable Comprehensive Plan (the "Plan") of which one key strategy was the simultaneous creation of a Medical Oriented District ("MOD"). The purpose of the MOD is to expand the Town's existing medical infrastructure and encourage economic

development, including capital investment, job creation and housing options. The MOD allows for a continuum of care, i.e., independent living, assisted living and nursing/hospital care, within or in neighboring facilities by centralizing medical services and related activities. As a designated zoning district, the MOD could include hospital, ambulatory surgery, primary and urgent care, hospice, laboratories, social services, boutique hotels and a wide range of housing.

The Company's existing 33,871 square foot Cortlandt Medical Center and its approximate twelve acres are located directly opposite New York Presbyterian's Hudson Valley Hospital Center and within the boundaries of the MOD. The Company has committed resources toward both market research and feasibility studies in support of achieving entitlements to maximize the value of the property. For approximately two years the Company along with its planner and engineers have been working closely with the Town to identify issues and solutions involved in creating the Plan and more specifically, the MOD.

On April 20, 2017, the Company closed on the purchase of a 1,950-square foot single-family residential dwelling located on approximately 0.3 acres in Cortlandt Manor, New York. The purchase price, inclusive of closing costs, was approximately \$343,000. The Company was able to take advantage of a distressed sale following foreclosure action by the lender. The property which adjoins the Cortlandt Medical Center and is across the street from New York Presbyterian Hudson Valley Hospital Center, is expected to become part of the Cortlandt Manor MOD. The property may provide additional vehicular access to the site from Buttonwood Drive and State Route 202 and additional parking which the Company believes will further increase the yield in a manner that is cost effective and should provide a significant return on investment to the shareholders.

The Company filed an application with the Town of Cortlandt Manor to develop the Cortlandt Manor property, on March 31, 2017, as follows:

SUBDIVISION LOT #	BUILDING
	SIZE/YIELD
MEDICAL OFFICE	100,000 sft
Multi-family apartments	200 units
Retail	4,000 sft

The Company has been working closely with Town officials on entitlement complexity, environmental impact studies, traffic mitigation, effluent, financial impact and other variables to ensure the application synchronizes with the Town's vision on the MOD. Furthermore, while we are pursuing the above entitlements, we are also seeking the approval of yield that can be transferred between the three proposed uses as market demand changes.

The entitlement costs from December 2013 through September 30, 2017 associated with the ownership and development of this property consisted of architectural and engineering costs, legal expenses, economic analysis, soil management, surveys and real estate taxes totaling \$1,170,706.

**Flowerfield.** Following extensive market research and related feasibility studies, we identified the entitlements that we believe will maximize the value of Flowerfield in the shortest amount of time with the lowest amount of risk. The Company has been in discussions with the Town of Smithtown on the potential real estate development projects identified by the market research and feasibility studies, all of which currently fall within our "as of right to build" zoning. We are also exploring with the Town of Smithtown whether it would be amenable to certain entitlements, special permits, or other concessions that would allow for the identified development projects.

In March 2017, the Company filed a pre-subdivision application with the Town of Smithtown (the "Pre-application") for the Flowerfield property along with the previously sold (2002) catering hall facility for an eight-lot subdivision. In June 2017, the Company filed a subdivision application with the Town of Smithtown based on feedback provided by the Town of Smithtown staff in the Pre-application process. Because of the property's location within 500 feet of a municipal boundary and a state road, the Town of Smithtown referred the Company's subdivision application to the Suffolk County Planning Commission as required by the Suffolk County Administrative Code and the New York State General Municipal Law.

On August 2, 2017, the Suffolk County Planning Commission voted 11-0 to approve Gyrodyne's subdivision application without conditions. The subdivision application is now referred back to the Town of Smithtown Planning Board which is currently reviewing the Company's application. Although the approval by the Suffolk County Planning Commission is not binding on the Town of Smithtown, the approval without conditions means that the requisite vote threshold at the Town of Smithtown's Town Board is a simple majority; had the Suffolk County Planning Commission approved the subdivision application with conditions, a supermajority would have been required for the Town of Smithtown's Town Board to approve the Company's subdivision application.

The details of the Company's subdivision application are as follows:

SUBDIVISION LOT #	LOT SIZE (acres)	LAND USE	BUILDING SIZE/YIELD
1	18	Existing Industrial Park – Mixed Use	132,719 SFT
2	12	Catering Hall (sold in 2002)	34,685sft
3	6	Hotel with restaurant, Spa/fitness and conference center	150 Rooms plus 150 seat restaurant 10,000 sft 500 seats
4	4	Medical Office /R&D Office building	53,400 sft
5	6	Medical Office/R&D Office building	76,350 sft
6	2	Assisted Living	104 units
7	3	Assisted Living	116 units
8	23	Common Area	

In addition to lot 8, the plan envisions an open space network of trails, benches and passive recreation that will serve as a recreational amenity to tie together the uses with in the overall Flowerfield campus landscape. The entitlement costs from December 2013 through September 30, 2017 associated with the ownership and development of this property consisted of architectural and engineering costs, legal expenses, economic analysis, soil management, surveys and real estate taxes totaling \$1, 711,452. The Company has an additional 5.2 acres bordering the industrial park that are currently zoned residential and are not part of the subdivision application.

While we cannot predict the outcome of the subdivision application, we have undertaken to subdivide the Flowerfield property in an accretive manner that is economically advantageous to both the Company and the surrounding communities.

As envisioned in the chart above, the subdivision application will seek to subdivide the Flowerfield property using a low-impact development campus approach that provides a complementary mix of land uses with a green space network throughout the subdivision. Opportunities for shared green space, roads, utilities and parking are incorporated into the plan and preserves the historic 200-foot setback from Route 25A. The Flowerfield campus would be a beautiful, environmentally sound and amenity enriched community that wouldn't overly burden existing infrastructure and the local community with the additional costs of the education of elementary and high school students. We believe the campus will generate a significant new real estate tax base for the Town of Smithtown and the Smithtown Central School District.

The Company's subdivision application is expected to include proposed uses for the subdivided lots, although the specific uses will be determined by the eventual purchasers. It is anticipated that the proposed uses described herein would be typical of those chosen by the future owners and as a result we requested that the subdivision be considered with those uses so that the purchasers of the lots would have an assigned density. Furthermore, while we are pursuing the above entitlements, we are also seeking the approval of yield that can be transferred between the three proposed uses as market demand changes. The Company's subdivision application includes perfecting the subdivision of the catering facility (12 acres hereafter referred to as lot 2) which the Company sold in 2002.

In accordance with the draft Smithtown Comprehensive Plan Update, the new additions to the Flowerfield campus would be focused on uses supportive and beneficial to Stony Brook University (SBU), namely, the development of a first class 150 bed hotel with conference facilities, restaurant and health club; medical office facilities; and assisted living facilities. Furthermore, the connection with SBU via the existing LIRR crossing, which we are actively negotiating the re-opening of, will help to foster synergy between Flowerfield and SBU.

Lot 1 encompasses the existing uses of the current light industrial park being retained thereby keeping in place jobs from the local business community, locations for back office operations of SBU, and studios for a vibrant arts community that yields cultural benefits to Smithtown and the surrounding communities.

Lot 2 owned by a catering facility that sits on a 12-acre lot that was sold in 2002. The subdivision was deferred by the town until the overall plan for Flowerfield was submitted.

Lot 3 is planned as a 150-room hotel that would include a 150-seat restaurant. The hotel could also have a 500-seat conference space and a 10,000-square foot day spa/fitness center. It is envisioned that this hotel would serve the adjacent catering facility, as well as the office uses on-site and the nearby SBU.

Lots 4 and 5 are envisioned as medical office, general office, or tech space (R&D) in support of SBU, its Hospital and Children's Hospital, and its Center of Excellence in Wireless and Information Technology (CEWIT). The two lots could be developed separately or as one larger lot. Approximately 129,750 square feet of office space in two buildings (53,400 and 76,350 sf) would be provided.

Lots 6 and 7 are envisioned as assisted living communities, comprising a total of 220 units, again either as two separate lots or one combined lot. There would be a synergy with the SBU Hospital and with the medical office uses for medical care of the residents of the assisted living facilities.

**Summary.** The Company has begun the process of pursuing entitlements, density and/or rezoning, and our ability to obtain required permits and authorizations is subject to factors beyond our control, including environmental concerns of governmental entities and community groups. The process will involve extensive analysis internally at the government entity level, as well as between government entities such as town planning departments and Gyrodyne, and will continue up until such time as entitlement, rezoning and density decisions are made by the relevant government entities. We hope to secure favorable decisions on entitlements, rezoning and density so that we can then seek the sale of our remaining properties at higher prices (than those achievable under their current entitlements) and then proceed with the intended liquidation and dissolution of the Company. As referred to above, the Suffolk County Planning Commission voted on August 2, 2017 to approve the Company's subdivision application without conditions. The application is now referred back to the Town of Smithtown, and will require approval of a simple majority of its Town Board for the Company to be able to proceed with its subdivision plan. The Town is now obligated to comply with the provisions of SEQRA in connection with its review of the subdivision application. The time period for the Town of Smithtown to complete its review of the subdivision application will not begin to run until the SEQRA process has been completed. The Company cannot predict with any reasonable degree of certainty the length of time it will take for the Town of Smithtown to complete the SEQRA process. The Company expects the process of pursuing entitlements, rezoning and density could take up to an additional fifteen months with the ultimate timing to a certain extent managed by Gyrodyne but ultimately dependent and under the control of the applicable municipality's planning board or other governmental authority.

### **Health Care Industry**

Tenants in our Cortlandt Manor and Port Jefferson properties are healthcare service providers. The healthcare industry is subject to substantial regulation and faces increased regulation particularly relating to fraud, waste and abuse, cost control and healthcare management. The healthcare industry may experience a significant expansion of applicable federal, state or local laws and regulations, previously enacted or future healthcare reform, new interpretations of existing laws and regulations or changes in enforcement priorities, all of which could materially impact the business and operations of our tenants and therefore the marketability of our properties. The recent U.S. presidential election, coupled with a Republican-controlled Congress, makes the repeal and replacement, or no replacement, of the Patient Protection and Affordable Care Act (the "Affordable Care Act") a possibility. A shift toward less comprehensive health insurance coverage and increased consumer cost-sharing on health expenditures could have a material adverse effect on our tenants' financial conditions and results of operations and, in turn, their ability to satisfy their contractual obligations.

Our tenants and operators are subject to extensive federal, state, and local licensure laws, regulations and industry standards governing business operations, the physical plant and structure, patient rights and privacy and security of health information. Our tenants' and operators' failure to comply with any of these laws could result in loss of licensure, denial of reimbursement, imposition of fines or other penalties, suspension or exclusion from the government sponsored Medicare and Medicaid programs, loss of accreditation or certification, or closure of the facility. In addition, efforts by third-party payors, such as the Medicare and Medicaid programs and private insurance carriers, including health maintenance organizations and other health plans, impose greater discounts and more stringent cost controls upon healthcare provider operations (through changes in reimbursement rates and methodologies, discounted fee structures, the assumption by healthcare providers of all or a portion of the financial risk or otherwise). Our tenants and operators may also face significant limits on the scope of services reimbursed and on reimbursement rates and fees, all of which could impact their ability to pay rent or other obligations to us.

As of September 30, 2017 the average effective rental revenue per square foot adjusted for tenant improvements was \$16.13 compared to \$16.37 on December 31, 2016 adjusted for buildings sold during the nine-months ended September 30, 2017. The Company defines the effective revenue per square foot as the annual rate per square foot stated in the lease reduced by the average annual tenant improvement allowance provided for in such leases.

### **Transaction Summary for the Nine Months Ended September 30, 2017**

The following summarizes our significant transactions and other activity during the nine-months ended September 30, 2017.

#### **Acquisition Activity**

##### *Acquisition:*

On April 20, 2017 the Company closed on the purchase of a single family residential building on approximately 0.3 acres bordering the Cortlandt Manor Medical Center for approximately \$343,000 inclusive of closing costs. The Company believes the property may provide additional vehicular access to its Cortlandt Manor property from Buttonwood Drive and State Route 202 and additional parking which the Company believes will further increase the yield in a manner that is cost effective.

*Employment:*

The Company and its Chief Executive Officer, Frederick C. Braun III, agreed in principle that Mr. Braun would separate from the Company, effective April 30, 2017. The decision to separate was a mutual one between the Company and Mr. Braun and made following discussions between the Board of Directors and management regarding the need for cost reductions. The Company filed a Current Report on Form 8-K on April 19, 2017, following the execution of a separation agreement with Mr. Braun dated April 6, 2017. The Board of Directors appointed Gary Fitlin as President and Chief Executive Officer effective May 1, 2017.

## Disposition Activity

### *Port Jefferson Professional Park:*

On June 15, 2017, Gyrodyne, LLC, through its wholly owned subsidiary GSD Port Jefferson, LLC, completed the sale of the two buildings located at 9 Medical Drive and 5380 Nesconset Highway, respectively, in the Port Jefferson Professional Park for an aggregate purchase price of \$2,000,000 pursuant to the previously announced Purchase and Sale Agreement dated as of March 30, 2017.

On August 4, 2017, Gyrodyne, LLC, through its wholly owned subsidiary GSD Port Jefferson, LLC, completed the sale of the building located at 1 Medical Drive in the Port Jefferson Professional Park for a purchase price of \$800,000 pursuant to the previously announced Purchase and Sale Agreement dated as of May 23, 2017.

## Investments

During the nine months ended September 30, 2017, the Company sold 100% of its investments in mortgage backed securities for \$3,983,562. The Company received principal payments during the nine months ended September 30, 2017 of \$129,587 from these investments.

## Leasing

During the nine-months ended September 30, 2017, the Company executed five new leases comprising approximately 7,500 square feet, approximately \$126,000 in annual revenue plus tenant reimbursements and total lease commitments of approximately \$408,000. In addition, the Company executed fifteen renewals comprising approximately 17,100 square feet and approximately \$280,500 in annual revenue.

The new lease and lease renewals signed during the nine-months ended September 30, 2017 included tenant allowances and rent abatements of approximately \$48,000 and \$16,000, respectively which were associated with total lease commitments of approximately \$315,000. The Company incurred approximately \$27,000 in lease commissions during the nine months ended September 30, 2017.

## Lease terminations/defaults

There were eleven terminations during the nine-months ended September 30, 2017, comprising approximately 19,000 square feet and approximately \$437,000 in annual revenue.

## Retention Bonus Plan

Payments made during the nine-months ended September 30, 2017 under the Retention Bonus Plan relating to the sales of three buildings in the Port Jefferson Professional Park were as follows:

Retention Bonus Plan Participants	Total
Board of Directors	\$ 197,633
Chief Executive Officer	50,898
Chief Operating Officer	46,863
Other Employees	8,658
Total	\$ 304,052

## Subsequent Events

### *Amendment to Advisory Agreement:*

On November 7, 2017, the Company entered into an amendment to the board adviser agreement dated May 24, 2016 (the “Adviser Agreement”) between the Company and Jad Fakhry, Manager of Poplar Point Capital Management, LLC, Gyrodyne’s largest shareholder. The amendment (i) extends the expiration date of the Adviser Agreement from November 24, 2017 to November 24, 2018, (ii) expands the scope of Mr. Fakhry’s duties to include attendance at all

Board meetings to which he is invited to attend, consulting with management and the Board on an as needed basis and advising the Board on the strategic process of liquidating the Company and maximizing shareholder value at any board meetings he is invited to attend, and (iii) increases Mr. Fakhry's advisory fee from \$2,500 to \$7,500 per quarter.

## Critical Accounting Policies

Gyrodyne is pursuing the opportunistic disposition of certain properties and the enhancement of the value of the Flowerfield and Cortlandt Manor properties, by pursuing various zoning/entitlement opportunities, which the Gyrodyne Board believes will improve the chances of obtaining better values for such properties. Gyrodyne intends to dissolve after it completes the disposition of all its real property assets, applies the proceeds of such dispositions first to settle any debts and claims, pending or otherwise, against Gyrodyne, and then makes liquidating distributions to holders of Gyrodyne common shares. Therefore, effective September 1, 2015 Gyrodyne adopted the liquidation basis of accounting. This basis of accounting is considered appropriate when, among other things, liquidation of the entity is imminent, as defined in ASC 205-30, Presentation of Financial Statements Liquidation Basis of Accounting. Under the LLC Agreement, the Board may elect, in its sole discretion and without any separate approval by the shareholders, to dissolve the Company at any time the value of the Company's assets, as determined by the Board in good faith, is less than \$1 million. The LLC Agreement also provides that the Company will dissolve, and its affairs wound up upon the sale, exchange or other disposition of all of the real properties of the Company. As a result, liquidation is "imminent" in accordance with the guidance provided in ASC 205-30.

**Principles of consolidation** - The consolidated financial statements include the accounts of Gyrodyne, LLC and all subsidiaries. All consolidated subsidiaries are wholly-owned. All inter-company balances and transactions have been eliminated.

**Basis of Presentation - Liquidation Basis of Accounting** – Under the liquidation basis of accounting the consolidated balance sheet, consolidated statement of operations, statement of equity, consolidated statement of comprehensive income and the consolidated statement of cash flows are no longer presented. The consolidated statement of net assets and the consolidated statement of changes in net assets are the principal financial statements presented under the liquidation basis of accounting.

Under the liquidation basis of accounting, all the Company's assets have been stated at their estimated net realizable value, or liquidation value, (which represents the estimated amount of cash that Gyrodyne will collect on the disposal of assets as it carries out the plan of liquidation), which is based on current contracts, estimates and other indications of sales value. All liabilities of the Company, including those estimated costs associated with implementing the plan of liquidation, have been stated at their estimated settlement amounts. These amounts are presented in the accompanying statements of net assets. These estimates are periodically reviewed and adjusted as appropriate. There can be no assurance that these estimated values will be realized. Such amounts should not be taken as an indication of the timing or amount of future distributions or our actual dissolution. The valuation of assets at their net realizable value and liabilities at their anticipated settlement amount represent estimates, based on present facts and circumstances, of the net realizable value of the assets and the costs associated with carrying out the plan of liquidation. The actual values and costs associated with carrying out the plan of liquidation may differ from amounts reflected in the accompanying financial statements because of the Plan's inherent uncertainty. These differences may be material. In particular, the estimates of our costs will vary with the length of time necessary to complete the plan of liquidation, which is currently anticipated to be completed by the end of 2018. The Company has begun the process of pursuing entitlements, density and/or rezoning, and our ability to obtain required permits and authorizations is subject to factors beyond our control, including environmental concerns of governmental entities and community groups. The process will involve extensive analysis internally at the government entity level, as well as between government entities such as town planning departments and Gyrodyne, and will continue up until such time as entitlement, rezoning and density decisions are made by the relevant government entities. We hope to secure favorable decisions on entitlements, rezoning and density so that we can then seek the sale of our remaining properties at higher prices (than those achievable under their current entitlements) and then proceed with the liquidation and dissolution of the Company. The Company expects the process of pursuing entitlements, rezoning and density could take up to an additional fifteen months with the ultimate timing to a certain extent managed by Gyrodyne but ultimately dependent and under the control of the applicable municipality's planning board or other governmental authority. Accordingly, it is not possible to predict with certainty the timing or aggregate amount which may ultimately be distributed to common shareholders and no assurance can be given that the distributions will equal or exceed the estimate presented in the accompanying statements of net assets.

The Company is pursuing value associated with the highest and best use for the Flowerfield property and the Cortlandt Medical Center. The actual costs of achieving such values may differ materially from the assumptions and estimates utilized and accordingly, could have a significant impact on the value of net assets in liquidation.

The Company 's assumptions and estimates (including the sales proceeds of all its real estate holdings, selling costs, retention bonus payments, rental revenues, rental expenses, capital expenditures, land entitlement costs, general and administrative fees, director and officer liability and reimbursement, post liquidation insurance tail coverage policy and final liquidation costs) are based on completing the liquidation by the end of 2018. As previously stated, on an ongoing basis, Gyrodyne evaluates the estimates and assumptions that can have a significant impact on the reported net assets in liquidation and will update accordingly for any costs and value associated with a change in the duration of the liquidation, as we cannot give any assurance on the timing of the ultimate sale of all the Company's properties.

**Management Estimates** – In preparing the consolidated financial statements in conformity with U.S. Generally Accepted Accounting Principles (“GAAP”) and the liquidation basis of accounting, management is required to make estimates and assumptions that affect the reported amounts of assets, including net assets in liquidation, and liabilities and disclosure of contingent assets and liabilities as of the date of the consolidated financial statements and the reported amounts of receipts and expenditures for the reporting period. Actual results could differ from those estimates.

The most significant estimates are the estimates on the net realizable value from the sale of our real estate, the estimated costs/time to pursue entitlements/change of zone and the related timeline to complete the liquidation.

**Allowance for doubtful accounts** – Rent receivable is carried at net realizable value. Management makes estimates of the collectability of rents receivable. Management specifically analyzes receivables and historical bad debts, customer concentrations, customer credit-worthiness, current economic trends and changes in customer payment terms when evaluating the adequacy of the allowance for doubtful accounts.

**Cash equivalents** - The Company considers all highly liquid debt instruments purchased with maturities of three months or less to be cash equivalents.

**Income taxes** - The Company follows the guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification, *Accounting for Uncertainty in Income Taxes*. This guidance, among other things, creates a two-step approach for evaluating uncertain tax positions. Recognition (step one) occurs when an enterprise concludes that a tax position, based solely on its technical merits, is more-likely-than-not to be sustained upon examination. Measurement (step two) determines the amount of benefit that more-likely-than-not will be realized upon settlement. Derecognition of a tax position that was previously recognized would occur when a company subsequently determines that a tax position no longer meets the more-likely-than-not threshold of being sustained. This interpretation specifically prohibits the use of a valuation allowance as a substitute for derecognition of tax positions, and it has expanded disclosure requirements. The Company believes it is more likely than not that its tax positions will be sustained in any tax examinations. The Company has no income tax expense, deferred tax assets or liabilities, associated with any such uncertain tax positions for the operations of any entity included in the consolidated statements of net assets. The Company’s open tax years are 2014, 2015 and 2016.

**Fair Value Measurements** – The Company believes the concepts for determining net realizable value are consistent with the guidance for measuring fair value. As a result, the Company follows the guidance of FASB Accounting Standards Codification, *Fair Value Measurements and Disclosures* to determine the fair value of financial and non-financial instruments. The guidance defines fair value, establishes a hierarchy framework for measuring fair value and expands disclosures related to the fair value. The guidance establishes a hierarchy breaking down observable and unobservable inputs into three levels: Level 1 – observable inputs in an active market on or around the measurement date, Level 2 – observable inputs that are based on prices not quoted on active markets but corroborated by market data and Level 3 – unobservable inputs utilized when no other data is available.

**New accounting pronouncements** - Management has evaluated the impact of newly issued accounting pronouncements, whether effective or not as of September 30, 2017, and has concluded that they will not have a material impact on the Company’s consolidated financial statements since the Company reports on a liquidation basis.

### Discussion of the Statements of Net Assets

Net assets in liquidation at September 30, 2017 would result in estimated liquidating distributions of approximately \$17.53 per common share. This is a decrease of \$1.43 from the December 31, 2016 net assets in liquidation of \$18.96 per common share, adjusted for the \$1.00 per share distribution declared in June 2017 and the tenant improvements required for a lease expansion with an existing tenant in the industrial park.

The cash balance at the end of the liquidation period (currently estimated to be December 31, 2018, although the estimated completion of the liquidation period may change), excluding any interim distributions, is estimated based on the September 30, 2017 cash balance of \$5.9 million plus adjustments for the following items which are estimated through December 31, 2018:

- 1.

Adjustments for the estimated cash receipts from the operation of the properties net of rental property related expenditures as well as costs expected to be incurred to preserve or improve the net realizable value of the property at its estimated gross sales proceeds.

2. Proceeds from the sale of all the Company's real estate holdings.
3. The net cash used to settle the working capital accounts and distributions announced but not yet paid.
4. The general and administrative expenses and or liabilities associated with operations and the liquidation of the Company including severance, director and officer liability inclusive of post liquidation tail policy coverage, and financial and legal fees to complete the liquidation.
5. Costs for the pursuit of the entitlement/rezoning of the Flowerfield and Cortlandt Manor properties, to maximize value
6. Estimated amounts based on the net realizable value of the real estate under the Retention Bonus Plan (See Note 12).

The Company estimates the net realizable value of its real estate assets by using income and market valuation techniques. The Company may estimate net realizable values using market information such as broker opinions of value, appraisals, and recent sales data for similar assets or discounted cash flow models, which primarily rely on Level 3 inputs. The cash flow models include estimated cash inflows and outflows over a specified holding period. These cash flows may include contractual rental revenues, projected future rental revenues and expenses and forecasted tenant improvements and lease commissions based upon market conditions determined through discussion with local real estate professionals, experience the Company has with its other owned properties in such markets and expectations for growth. Capitalization rates and discount rates utilized in these models are estimated by management based upon rates that management believes to be within a reasonable range of current market rates for the respective properties based upon an analysis of factors such as property and tenant quality, geographical location and local supply and demand observations. To the extent the Company under estimates forecasted cash outflows (tenant improvements, lease commissions and operating costs) or over estimates forecasted cash inflows (rental revenue rates), the estimated net realizable value of its real estate assets could be overstated.

The Company is pursuing various avenues to maximize total distributions to our shareholders during the liquidation process. The Company estimates that it will incur approximately \$2.04 million (included in the statements of net assets as part of the estimated liquidation and operating costs net of receipts, See Note 7) in land entitlement costs over the 15 months ended December 31, 2018, inclusively, in an effort to obtain entitlements, inclusive of zone changes and special permits. The Company believes the commitment of these resources will enable the Company to position the properties for sale with all entitlements necessary to maximize the Flowerfield and Cortlandt Manor property values. During the first nine months of 2017, the Company incurred approximately \$1.4 million of land entitlement costs, of which approximately \$343,000 was for the purchase of a single-family residence on a 0.3-acre lot of adjacent land to the Cortlandt Manor Medical Center, inclusive of closing costs. The Company believes the remaining balance of \$2.04 million will be incurred from October 2017 through the end of liquidation. The Company does not intend to develop the properties but rather to commit resources to position the properties for sale in a timely manner with all entitlements necessary to achieve maximum pre-construction values. The costs and time frame to achieve the entitlements could change due to a range of factors including a shift in the value of certain entitlements making it more profitable to pursue a different mix of zones/entitlements and the dynamics of the real estate market. As a result, the Company has focused and will continue to focus its land entitlement efforts on achieving the highest and best use. During the process of pursuing such entitlements, the Company may entertain offers from potential buyers who may be willing to pay premiums for the properties that the Company finds more acceptable from a timing or value perspective than completing the entitlement processes itself. The value of the real estate reported in the Statements of Net Assets as of September 30, 2017 (predicated on current asset values) does not include any potential value impact that may result from the estimated \$2.04 million in land entitlement costs. There can be no assurance that our value enhancement efforts will result in property value increases that exceed the costs we incur in such efforts, or even any increase at all.

The Company is making tenant improvements at Flowerfield to convert certain existing industrial space into office space to meet our expanding relationship with Stony Brook University, which the Company believes will enhance the value of the property as a whole by improving the building space and drawing a high quality long-term tenant. It would also increase the synergy with the University and allow for a portion of the trip generation from this office space to be accommodated using the internal access point between the properties. The Company believes that the planned tenant improvements will cost approximately \$840,000 and that we will likely finance the cost of such tenant improvements with a credit facility, rather than using our cash on hand. There can be no assurance that the Company will be able to secure financing on terms that are financially prudent, or that any resulting increase in value of the Flowerfield property will exceed the cost of our planned tenant improvements including the cost of any related financing.

The net assets in liquidation at September 30, 2017 (\$25,991,825) results in estimated liquidating distributions of approximately \$17.53 per common share (1,482,680 shares outstanding), based on estimates and other indications of sales value but excluding any actual additional sales proceeds that may result directly or indirectly from the remaining \$2.04 million in land entitlement costs. Neither the additional value that may be derived from the land entitlement costs, nor the retention bonuses for the sale of the Flowerfield and Cortlandt Manor properties are included in the estimated liquidating distributions as of September 30, 2017 and December 31, 2016. The Company believes the land entitlement costs will enhance estimated distributions per share through the improved values from the sales of the Flowerfield and Cortlandt Manor properties. This estimate of liquidating distributions includes projections of costs and expenses to be incurred during the period required to complete the plan of liquidation. There is inherent uncertainty with these projections, and they could change materially based on the timing of the sales, improved values of the Cortlandt Manor and/or Flowerfield properties resulting from the land entitlement efforts net of any bonuses if such values exceed the

minimum values required to pay bonuses under the retention bonus plan, favorable or unfavorable changes in the land entitlement costs, the performance of the underlying assets, the market for commercial real estate properties generally and any changes in the underlying assumptions of the projected cash flows.

The following table summarizes the estimates to arrive at the Net Assets in Liquidation as of September 30, 2017 (dollars are in millions).

September 30, 2017 cash and cash equivalents balance	\$	5.87
Interest income offset by net cash used to settle current working capital acct and security deposits		(0.76) <sup>(i)</sup>
Free cash flow from rental operations		0.15 <sup>(ii)</sup>
General and administrative expenses including final liquidation and dissolution		(3.24) <sup>(iii)</sup>
Land entitlement costs in pursuit of the highest and best use		(2.04) <sup>(iv)</sup>
Gross real estate proceeds		28.68
Selling costs on real estate		(1.72)
Retention bonus plan for directors, officers and employees		(0.07) <sup>(v)</sup>
Severance		(0.46)
Directors and officers insurance ("D&O") – tail policy		(0.41)
Other		(0.01)
Net Assets in Liquidation	\$	<u>25.99</u> <sup>(vi)</sup>

- (i) The Company estimates interest income will be offset by the settlement of its working capital accounts resulting in a balance of \$(0.76).
- (ii) The Company estimates the cash proceeds from rental operations net of commissions and rental costs, inclusive of expenditures to preserve or improve the properties at its current estimated market value will total \$0.15.
- (iii) The General and Administrative expenses are estimated to be \$3.24. The costs represent all costs to liquidate the company excluding rental operating costs and non-operating costs (D&O tail and severance).
- (iv) The Company is considering various options to maximize total distributions to our shareholders during the liquidation process. The Company estimates that it will incur approximately \$2.04 million in costs over the 15-months ending December 31, 2018 to obtain entitlements, inclusive of zone changes and special permits that it believes will result in maximizing the values in the Flowerfield and Cortlandt Manor properties. The Company does not intend to develop the properties but rather to commit resources to position the properties for sale in a timely manner with all entitlements necessary to achieve maximum pre-construction values. During the process of pursuing such entitlements, the Company may entertain offers from potential buyers who may be willing to pay premiums for the properties that the Company finds more acceptable from a timing or value perspective than completing the entitlement processes.
- (v) The gross real estate proceeds do not include any value impact that may result from the estimated land entitlement costs. As a result, fair value as reported does not exceed the minimum value under the retention bonus plan (the appraisal of the real estate in late 2013 plus the estimated entitlement costs) and accordingly the Company has not included any estimated bonuses on the sale of the Cortlandt Manor or Flowerfield properties. However, if the Company concludes in future periodic filings that the value of the real estate to the extent actual net proceeds from the ultimate disposition of the properties exceed the value of the real estate reported in the Statement of Net Assets as of September 30, 2017, and such net proceeds exceeds the minimum value required to pay bonuses under the retention bonus plan (whether due to appreciation of the underlying real estate and/or a reduction in estimated land entitlement costs), then the Company will report the updated estimated real estate value and the estimated bonuses related to such value of the Cortlandt Manor and/or Flowerfield properties in accordance with the provisions of the retention bonus plan.
- (vi) The net assets in liquidation at September 30, 2017 would result in liquidating distributions of approximately \$17.53 per Common Share (\$25.99 million with 1,482,680 shares outstanding), excluding any additional sales proceeds, that may result directly or indirectly from the remaining \$2.04 million in land entitlement costs. The Company believes the land entitlement costs will enhance estimated distributions per share through the improved values from the sales of the Flowerfield and Cortlandt Manor properties. This estimate of liquidating distributions includes projections of costs and expenses to be incurred during the period required to complete the liquidation process. There is inherent uncertainty with these projections, and they could change materially based on the timing of the sales, favorable or unfavorable changes in the land entitlement costs, the performance of the underlying assets and any changes in the underlying assumptions of the projected cash flows.

### Discussion of Changes in Net Assets

Gyrodyne's strategy is to enhance the value of Flowerfield and Cortlandt Manor, by pursuing various zoning or entitlement opportunities, which the Gyrodyne Board believes will improve the chances of obtaining better values for such properties. The pursuit of the highest and best use of Flowerfield and Cortlandt Manor may involve the acquisition of properties, pursuit of joint venture relationships and other investments and or other strategies to maximize the returns for our shareholders. Gyrodyne intends to dissolve after it completes the disposition of all of its real property assets, applies the proceeds of such dispositions first to settle any debts and claims, pending or otherwise, against Gyrodyne, and then makes liquidating distributions to holders of Gyrodyne common shares. Therefore, the Company includes in its financial statements the Statement of Changes in Net Assets for the nine-months ended September 30, 2017 which is discussed below:

Net assets in liquidation at January 1, 2017	\$ 28,111,612
Changes in net assets in liquidation for the nine-months ended September 30, 2017:	
Changes in market value of securities	25,918
Remeasurement of assets and liabilities in liquidation	(1,113,025)
Change in liquidation value of real estate	450,000
Net increase in net assets in liquidation	(637,107)
	)
Liquidating distribution to shareholders	(1,482,680 <sup>(a)</sup> )
Total change in net assets in liquidation	(2,119,787)
Net assets in liquidation at September 30, 2017	<u>\$ 25,991,825</u>

- (a) On June 16, 2017, the Company declared a special cash distribution on the Company's common shares of limited liability company interests of \$1.00 per share, or \$1,482,680 in the aggregate, payable July 7, 2017 to shareholders of record at the close of business on June 27, 2017. The special distribution consisted of proceeds from the sale of 9 Medical Drive and 5380 Nesconset Highway in the Port Jefferson Professional Park.

### LIQUIDITY AND CAPITAL RESOURCES

*Cash Flows:* As we pursue our plan to sell our properties opportunistically, including certain enhancement efforts, we believe that a main focus of management is to effectively manage our statement of net assets through cash flow management of our tenant leases, maintaining or improving occupancy, and enhance the value of the Flowerfield and Cortlandt Manor properties via the pursuit of the associated Change in zone/entitlements.

As the Company executes on the sale of assets, it will no less than annually, review its capital needs and declare and distribute dividends of any excess cash, accordingly. Upon completion of these activities, if successful, Gyrodyne will distribute the remaining cash to its shareholders and then proceed to complete the dissolution of the Company, delist its shares from NASDAQ or other exchange platform and terminate its registration and reporting obligations under the Securities Exchange Act of 1934, as Amended (the "Exchange Act"). Gyrodyne is required to make adequate provisions to satisfy its known and unknown liabilities which could substantially delay or limit its ability to make future distributions to shareholders. The process of accounting for liabilities, including those that are currently unknown or whose amounts are uncertain may involve difficult valuation decisions which could adversely impact the amount or timing of any future distributions.

Even if we are successful in maintaining compliance with applicable NASDAQ listing requirements, our board of directors may decide that the costs of compliance and the demands of management time and Company resources required to maintain our NASDAQ listing are greater than the benefits received by the Company and its shareholders from being a listed company and that, accordingly, consistent with other cash management and cost reduction measures that we have implemented, we should voluntarily delist from the NASDAQ Capital Market. If our common shares were delisted from NASDAQ voluntarily or involuntarily, trading of our common shares most likely will be conducted in the over-the-counter market on an electronic bulletin Board established for unlisted securities such as the Pink Sheets or the OTC Bulletin Board which will reduce the market liquidity of our common shares. As a result, an investor would find it more difficult to dispose of, or obtain accurate quotations for the price of, our common shares. We cannot assure you that our common shares, if delisted from NASDAQ voluntarily, or if they would be delisted involuntarily by NASDAQ, will be listed on another national securities exchange or quoted on an over-the counter quotation system.

We generally finance our operations and acquisitions through cash on hand.

As of September 30, 2017, the Company had cash and cash equivalents totaling approximately \$5.9 million. The Company anticipates that its current cash and cash equivalent balance will be adequate to fund its liquidation process and dissolution over the next twelve months. The \$5.9 million of cash will be partially used to fund the pursuit of the highest and best use of its Flowerfield and Cortlandt Manor properties while simultaneously pursuing the opportunistic sale of our properties. The pursuit of the highest and best use of Flowerfield and Cortlandt Manor may involve the acquisition of properties, pursuit of joint venture relationships and other investments and or other strategies to maximize the returns for our shareholders. The Company estimated and reported in the Statement of Net Assets total gross cash proceeds from the sale of its assets of approximately \$28.7 million. Based on the Company's current cash balance and the above forecast, the Company estimates distributable cash stemming from the liquidation of the Company of approximately \$26.0 million.

The Company's primary sources of funds which are limited and expected to narrow as we liquidate properties and make distributions are as follows:

- current cash and cash equivalents;
- rents and tenant reimbursements received on our remaining real estate operating assets; and
- sale of assets.

Excluding gross proceeds from the sale of assets, the Company's gross rents and tenant reimbursements net of rental expenses is less than the combined total annual general and administrative costs, capital expenditures and land entitlement costs creating a net use of cash on an annual basis through the liquidation process. The Company believes the cash and cash equivalents plus the proceeds from the sale of assets will exceed the costs to complete the liquidation of the Company. In addition, the Company has and will continue to review operating activities for possible cost reductions throughout the liquidation process.

The Company's primary non-operating cashflows for the nine months ended September 30, 2017 were as follows:

- \$2,590,645 in net proceeds from the sale of buildings located at 9 and 1 Medical Drive and 5380 Nesconset Highway in the Port Jefferson Professional Park.
- \$3,983,562 in net proceeds from the sale of 100% of the Company's investment in mortgage backed securities.
- \$129,587 in principal repayments on the investment in mortgage backed securities.

Our primary non-operating uses of cash for the nine months ended September 30, 2017 were as follows:

- \$605,290 of costs incurred in the pursuit of entitlements for the Cortlandt Manor property inclusive of the residential lot purchase of \$343,000 (inclusive of closing costs).
- \$768,965 of costs incurred in the pursuit of entitlements for the Flowerfield property.
- \$358,221 of capital expenditures on the real estate portfolio excluding those costs incurred under the land entitlement effort.

The Company is making tenant improvements at Flowerfield to convert certain existing industrial space into office space to meet our expanding relationship with Stony Brook University, which the Company believes will enhance the value of the property as a whole by improving the building space and drawing a high quality long-term tenant. The Company believes that the planned tenant improvements will cost approximately \$840,000 and that we will likely finance the cost of such tenant improvements with a credit facility, rather than using our cash on hand. There can be no assurance that the Company will be able to secure financing on terms that are financially prudent, or that any resulting increase in value of the Flowerfield property will exceed the cost of our planned tenant improvements including the cost of any related financing.

#### Acquisitions:

On April 20, 2017, the Company closed on the purchase and sale agreement dated March 13, 2017, on a 1,950-square foot house (0.3-acre lot), in Cortlandt Manor, for approximately \$343,000, inclusive of closing costs. The property may provide additional vehicular access to the site from Buttonwood Drive and State Route 202 and additional parking which the Company believes will further increase yield in a manner that is cost effective.

#### Dispositions:

##### Port Jefferson Professional Park

During the nine months ended September 30, 2017, the Company entered into and closed on two Purchase and Sale Agreements as follows:

On March 30, 2017, the Company's wholly-owned subsidiary GSD Port Jefferson, LLC entered into a Purchase and Sale Agreement to sell the two buildings located at 9 Medical Drive and 5380 Nesconset Highway, respectively, in the Port Jefferson Professional Park for \$2,000,000, in the aggregate subject to an evaluation period that would have expired thirty days following signing (with an optional extension period of ten days which the purchaser had exercised), during which time the purchaser had the right to terminate the agreement by written notice to GSD Port Jefferson, for any reason or no reason, in which case the purchaser would have had the right to receive a refund of its \$100,000 deposit. The Company closed on this transaction on June 15, 2017.

On May 23, 2017, the Company's wholly-owned subsidiary GSD Port Jefferson, LLC entered into a Purchase and Sale Agreement to sell the real property known as 1 Medical Drive, Port Jefferson Station, New York for \$800,000, subject to an evaluation period that expired sixty days following signing (with an optional extension period of fifteen days which the purchaser had exercised), during which time the purchaser shall have the right to terminate the agreement by written notice to GSD Port Jefferson, for any reason or no reason, in which case the purchaser would have had the right to receive a refund of its \$40,000 deposit. The Company closed on this transaction on August 4, 2017.

The Company has one remaining building (comprising approximately 3,500 square feet) within the same medical park which is being actively marketed for sale.

#### **LIMITED PARTNERSHIP INVESTMENT**

The Company has a 10.12% limited partnership interest in Callery-Judge Grove, L.P. (the “Grove”), which is in the process of liquidation. The proceeds, if any, that the Company may receive effectively reflect an illiquid receivable and therefore there is no net realizable value included in the Company’s Statements of Net Assets from this investment.

**Item 3. Quantitative and Qualitative Disclosures about Market Risk.**

The Company places its temporary cash investments with high credit quality financial institutions. Certain financial instruments could potentially subject the Company to concentrations of credit risk, such as cash equivalents and longer-term investments. The Company maintains bank account balances, which exceed FDIC insurance limits. The Company has not experienced any losses in such accounts and believes that it is not exposed to any significant credit risk on cash. Management does not believe significant credit risk exists at September 30, 2017.

The Company believes there have been no significant changes in market risk from that disclosed in the Company's Report on Form 10-K for the twelve months ended December 31, 2016, filed with the Securities and Exchange Commission on March 31, 2017.

#### **Item 4. Controls and Procedures.**

The Company's management, including the Chief Executive Officer ("CEO")/ Chief Financial Officer ("CFO"), has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report (the "Evaluation Date"). Based on such evaluation, our management concluded that our disclosure controls and procedures were effective, at a reasonable assurance level, as of the Evaluation Date, to ensure that information required to be disclosed in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management in a manner that allows timely decisions regarding required disclosures.

An evaluation was performed under the supervision and with the participation of the Company's management of the effectiveness of the design and operation of the Company's procedures and internal control over financial reporting as of September 30, 2016. In making this assessment, the Company used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework of 2013 (the "2013 COSO Framework"). Based on that evaluation, the Company's management concluded that the Company's internal controls over financial reporting were effective as of September 30, 2017.

#### **CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING**

There was no change in our internal control over financial reporting identified with our evaluation that occurred during the fiscal quarter ended September 30, 2017, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

### **PART II - OTHER INFORMATION**

#### **Item 1. Legal Proceedings**

##### ***Putative Class Action Lawsuit***

On July 3, 2014, a purported stockholder of Gyrodyne Company of America, Inc. (the "Corporation") filed a putative class action lawsuit against the Corporation and members of its Board of Directors (the "Individual Defendants"), and against GSD and the Company (collectively, the "Defendants"), in the Supreme Court of the State of New York, County of Suffolk (the "Court"), captioned *Cashstream Fund v. Paul L. Lamb, et al.*, Index No. 065134/2014 (the "Action"). The complaint alleged, among other things, that (i) the Individual Defendants breached their fiduciary duties or aided and abetted the breach of those duties in connection with the merger of the Corporation and GSD into the Company (the "Merger") and (ii) the Corporation and the Individual Defendants breached their fiduciary duties by failing to disclose material information in the proxy statement/prospectus relating to the Merger.

On August 14, 2015, the parties to the Action entered into a Stipulation of Settlement (the "Settlement") providing for the settlement of the Action, subject to the Court's approval. Under the Settlement, the Corporation and the Company amended the proxy statement/prospectus on August 17, 2015 with certain supplemental disclosures, and agreed that any sales of its properties would be effected only in arms'-length transactions at prices at or above their appraised values as of December 2014. The plaintiff, on behalf of itself and the members of the putative class it represented, agreed to release and dismiss with prejudice all claims that had or could have been asserted in the Action or in any other forum against the Defendants and their affiliates and agents arising out of or relating to the Merger and the other transactions alleged by plaintiff in its complaint, as supplemented. On April 8, 2016, the Court entered a Final Order and Judgment approving the Settlement. By order of the same date, the Court also granted plaintiff's application for an award of attorney's fees and reimbursement of expenses in the amount of \$650,000 which was paid in full in April 2016.

As of September 30, 2017, the aggregate value, based on the 2016 appraisals, of the remaining unsold properties was \$150,000 lower than the 2014 appraised values.

### ***Other Proceedings***

In addition to the foregoing, in the normal course of business, the Company is a party to various legal proceedings. After reviewing all actions and proceedings pending against or involving the Company, management considers that any loss resulting from such proceedings individually or in the aggregate will not be material to the Company's financial condition or results of operations.

Items 2 through 5 are not applicable to the Company in the nine months ended September 30, 2017.

### **Item 6. Exhibits.**

- 3.1 Restated Certificate of Incorporation of Gyrodyne Company of America, Inc. (1)

EX-31.1 2 ex\_99905.htm EXHIBIT 31.1

**Exhibit 31.1****Rule 13a-14(a)/15d-14(a) Certification**

I, Gary Fitlin, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Gyrodyne, LLC;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

EX-32.1 3 ex\_99906.htm EXHIBIT 32.1

Exhibit 32.1

**CFO CERTIFICATION PURSUANT TO  
18 U.S.C. SECTION 1350,  
AS ADOPTED PURSUANT TO  
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the quarterly report of Gyrodyne, LLC (the "Company") on Form 10-Q for the period ended September 30, 2017, as filed with the Securities and Exchange Commission (the "Report"), I, Gary Fitlin, Chief Executive Officer and Chief Financial Officer, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the consolidated financial condition of the Company as of the dates presented and consolidated results of operations of the Company for the periods presented.

Date: November 9, 2017
